

ACCOMPTS OF MERCHANDIZE

Ready Computed.

With TABLES for the easie
and speedy Measuring of Tim-
ber, Boards, Glass and Land:
Resolving any Question in Buy-
ing and Selling, by the Pound
or Hundreds.

With the Manner of making a
square Banation of any Number
of Men from 100 to 40000.
Foreign Coins and Measures
brought to our own, all per-
form'd at Sight.

*this Fourth Edition, above a
hundred Faults Amended.*

WITH
TABLES Shewing the true Va-
lue of any Estate, whether in Pos-
session, or Reversion, and the Deci-
mal Parts of a Pound.

John Penkilman, Gent.

Printed in the Year 1678.

F*irst Published by*
Order and Recommendation
tion of King CHARLES
the FIRST.

Instructions for the Reader.

TO the End that every Man may Buy and Sell without mis-reckoning in his Account, and without the trouble of Pen or Counters, I have with long Time and much Labour, endeavoured to find out an Arbidgment, which, for the publick Good, I have now put into this little Volume, and may serve all, who shall have occasion to Buy, Sell, Lend, Borrow, or make Bartage, turn Monies out of one kind into another, as also for Measures, and others Things of like Nature. And moreover interposing your own Judgment, you shall perceive the Vertue of this continual proportion of Numbers: And shall of your self find out divers Things of good Use. To come then to the Purpose: First, you must consider that this Book beginneth with 2. in the first Page,

Instructions for the Reader.

with 3 in the second, 4 in the third; and 5 in the fourth; keeping still the same Order to a Thousand; which Number of 1000 at the last Page of the Title *Merchandise*: And this may serve you at all times for Commerce and Merchandise, *viz.* Cloths, Silks, Wool, Iron, Oyl, and all other such things in what Country of the World it ever: As for example, if one should sell you two Yards of Velvet, opening the Book, you find the Number of 2 in the first Page under the Title of *Merchandise*. Now put Case, that this Velvet was sold for six Crowns the Yard, look then for your Number of 6 in the first Column of the said Page, and right before the Number of 6, you shall find the Sum of 2 Yards, which is 12 Crowns. And if the Price were seven, before seven likewise you find his Sum, and so following on from Number to Number, you shall find the value of any thing. For Conclusion then, every Number

be

Instructions for the Reader.

ter of Merchandize hath it's Price
see it's proper Page. As for exam-
ple: A Merchant hath bought 45
barrels of Powder at 38 Crowns
each a Barrel: Open the Book, and
at the Page of 45, looking now be-
fore the Number of 38, you find
1710, Crowns, which is the Sum
that the said Barrels amount unto
at that Price. Using this rule,
you may apply it to Pounds, Shil-
lings, Pence, or any other sort of
Money. As for example: A Man
bought 25 Yards of Cloath
at 12 Shillings the Yard; turn to
the Page 25, and looking to the
Number 12, you shall find that the
said 25 Yards amount to 300 Shil-
lings. Now a third Rule is this,
when one hath an Account to make
of 2 sorts of Money. As for ex-
ample: One hath bought 20 Pound
of Spicery at 8. s. 4. d. the Pound,
go first to the Page 20, and there
you shall find before 8, 160, for
shillings; then for the Pence, look
before 4, and you shall find 80. Now

Instructions for the Reader.

with 3 in the second, 4 in the third; and 5 in the fourth; keeping still the same Order to a Thousand; which Number of 1000 at the last Page of the Title *Merchandise*: And this may serve you at all times for Commerce and Merchandise, *viz.* Cloths, Silks, Wool, Iron, Oyl, and all other such things in what Country of the World it ever: As for example, if one hath sold you two Yards of Velvet, opening the Book, you find the Number of 2 in the first Page under the Title of *Merchandise*. hath bought 25 Yards of Cloath
for 12 Shillings the Yard; turn to
the Page 25, and looking to the
Number 12, you shall find that the
said 25 Yards amount to 300 Shil-
lings. Now a third Rule is this,
when one hath an Account to make
of 2 sorts of Money. As for ex-
ample: One hath bought 20 Pound
of Spicery at 8. s. 4. d. the Pound,
go first to the Page 20, and there
you shall find before 8, 160, for
shillings; then for the Pence, look
before 4, and you shall find 80. Now

Instructions for the Reader.

to bring these Shillings into Pounds and Pence into Shillings, you shall learn anon. I will first give you another example of divers kinds of Moneys. One buyeth four Pieces of Cloath at 13. l. 4. s. 2. d. the Piece, you shall first have recourse to the Page 4, where looking before 13, you shall find 52, Pounds, and before 4, 16 Shillings; before 2, 0 Pence: So the Sum is 52 l. 16 s. 8 d. If you observe this Rule, you shall be sure not to mis-reckon either in Buying or Selling, without the help of Pen or Counters. For another example: The Governour of a Colledge or Hospital is charged with 500 Persons to be maintained for 27 Crowns a Man by the Year. He desireth to know how much all this Charge may come to in a Year. let him look in the Page 500, and before 27 he shall find 13500. Yet another example: A Gentleman hath set on work 14 Labourers, having agreed to give to every one 7 s. for the week: Now he oweth them for

Instructions for the Reader.

undo weeks: To know then how
much all comes to, let him have re-
course to Page 14, where over a-
gainst 7 he shall find 98 Shillings
due for every week; then because
he oweth for 20 weeks, let him look
upon the Page 98, and over against
there he shall find the Number of
an 960, which is so many Shillings due
2, or so many weeks. And if now
you would know how many Pounds
the said 960 Shillings do make, look
the Page 20, because 20 Shillings
make one Pound, and there finding
an 960, against it, you shall see 98,
and so many Shillings make so ma-
ny Pounds. The general Rule
then is, that when you would reduce
Shillings to Pounds, you must have
recourse to the Page 20. But if the
quantity of your Shillings be not
precisely to be found, look the Num-
ber nearest it: As in this familiar
example: You desire to know how
many Pounds 584 Shillings come to,
and looking in the Page 20, you
cannot find the Number of 584.

A 4

Take

Instructions for the Reader.

Take then 580, which is the nearest your Number, and before it ydy see 29, whereupon say, that 580 Shillings make 29 Pounds 4 Shillings, which 4 wanted in the Number you found. And with this Method you may turn Shillings into Pounds, Pence into Shillings, Ounces into Pounds, Drams into Ounces, and so consequently all other things of like kind: As for example: One having in his purse 1200 Pence, desireth to know how many Shillings they make: Now because 12 Pence make one Shilling, let him look Page 12, and over against 1200 he shall find 100, the just Sum of 1200 d. put into Shillings, but if you cannot find precisely the Number you desire, seek the next: As for example, you would know how many Shillings 849 Pence do make; because you do not find 849, take 840, before which you find 70, and so many Shillings, besides the odd Pence which are to be added, do your 849 Pence come to.

After

Instructions for the Reader.

After the same fashion shall you
neafind out how to divide a Sum equal-
t ydy amongst divers Persons: As for
58 your better understanding in this
Shexample : Five Men travelling to-
l together, have spent 90 Shillings: If
Myou would know how much this
incomes to a Piece, look Page 5,
Duwhere finding 90 before it, you see
Du18, and so much is every ones Part.
theEight Souldiers get a Prize worth
am400 Pounds; Now to know what
20 each Mans share is, look Page 8,
anwhere finding 400, you see before
ustit 50. And in case you find not
ninyour precise Number, take that
00which is nearest it, so proceeding
10as is before declared. Now for
youMeasures, your Practice must be on
berthis Manner: I have a Field of
AsGround in length 45 Perches or
ow Pole, in breadth 25, to know how
do many Pole square be in this Field,
9, I go to the Page 45, and finding
0, there 25, before it, I see 1125, so
e many Percnes square have I in my
d, Field. The same proportion is to
A 5 be

Instructions for the Reader.

be used in all Measures of the like
for breadth and length : But for the
measuring of a Wall, or any other
thing wherein besides the breadth
and length, you would have the
thickness put in, you must proceed
on this Manner : If you would have
a Wall of 12 Yards long, 6 Yards
high, and 2 Yards thick, to know
how many Yards of Wall here be
in all, first go to the Page 12, and
seek 6, before which you find 72
Then look the Page 72, and seek
the Number 2, (which is for the
thickness) before which you find
144, and so many Yards of Wall
is the whole put together.

I have endeavoured to explain
my self, and the Use of this Table
in as plain a manner, as I could, out
of my desire and good Will to the
Publick.

*The working of any Question
in Division.*

First, seek your Divisor at the top of the leaf, and in the real or the sort of Numbers seek the Number to be divided, and the Number to the left hand will be the quote. And if you find not your Dividend directly in the Table, you must take the Number next less to it. Example, 16000 po. of Land how many acres of Land, look for 16000 where finding the first Number, at your left hand you shall find 100, which is the Sum of acres. But admit 16000 were the Number you desired, to know then would it be 100 Acres and 4 Pole.

In Multiplication.

First seek the Number general to be Multiplied at the top of the leaf, and the Multiplier at the left hand of the same leaf, and the Number towards your right hand is the Product. If any greater Number than you find in this Book, doe thus, as if you would multiply 93728. by 43. prick them thus

9. 37.

28. 43.

Then look what 43 times 28 is, and you shall find it to be 1204.

1591.

387 and so

place the rest :

total 4030304.

F 5

Fellowship.

Fellowship.

FOur men make a stock, the first puts in 11 Crowns, the second 17, the third 25, the fourth 33, the Stock increaseth to 4300 Crowns. To know what every one should have for his Part, first add them together, and they make 86, then look 86 in the areal Number for 4300 the increase of the whole, and against that to your left hand, I find 50 so much gained every Crown. Now look for 50 and against 11 I find 550 for the first Man. For the second 17 I find 850. For the third 25 I find 1250. For the fourth which put in 33 I find 1650, to prove this add the four Sums together, and they make 4300, which is the Total of the gain here appeareth.

11	—	550
17	—	850
25	—	1250
33	—	1650
		4300

If you find not your Number among the areal Numbers, then take the Number next less to yours, and keep in mind the remainder, which brought in to Shillings or Pence, work as afore.

The Manner and Order of making a square Battalion out of any Number of Souldiers, from 100 to 40000.

FOR as much as the knowledge of Marshalling an Army of Souldiers in Field, is a thing laudable in a Prince, and requisite in him that intendeth to practise the Art Military, I have thought good to frame a Table of such a fashion, that the Number of Souldiers being known, they may suddenly be put into rank: For understanding of which, you must know that this Table beginneth with the Number of 100, and endeth in 40000. Let then the Number of Souldiers which you would put into Battel array, be 100. To know now how many ranks to make and how many to put in a rank, first look the Number 100, which is the first in the Table, over against which you find 10, wherefore you shall say that you must put ten Souldiers in each Rank, and there will be ten Ranks: So likewise if a Sergeant Major have in Field 14400 Souldiers, to put them presently in Battail order, look the Number 14400 in the Table, proceeding forwards, and you shall

shall find over against it in direct line
on the left hand in Number of 120
wherefore so placing your Souldiers by
120 in a Rank, you have put them all
into Battail aray: And if the Number
of the Souldiers be such, that you cannot
find it precisely, take the Number
which is nearest to that you seek. As
for example, you have 7100 Souldiers
of which you would make a square Bat-
talion: And seeking in the Table, you
do not find that Number, but which is
near your Number, you find 7056 and
over against it 84, wherefore I say, you
must make 84 Ranks, with 84 Souldiers
in each Rank, and you have a square
Battail, and 44 Souldiers remaining,
which you may send for Scouts, and
for Centinels, or otherwise dispose
as you please. And thus by this
Table you may put into a square form
of Battail any Number of Souldiers,
which is not above 40000.

FOR the use of the Table of
Timber measuring next ensu-
ing, first find the Square of the
piece beginning at 6 and ending at
8, and likewise one side broader
than the other from 6 to 2. If it,
look the square supposed to be 6,
at your left hand, in the Table,
and towards your right hand in the
same Line, you shall find four Feet,
so much in length of that piece ma-
keth a Foot. But admit it were 6
and a half square, then look 6 and
in the next Line, and in the same
line you shall find three Foot 5
Inches, and one seventh part of an
Inch to a Foot.

Also admit a piece of Timber
30 or any other number square,
you find no such number in your
Table, then take the one half of it
which is 15, and towards your right
and you shall find 7 Inches, and
two third parts, so much of your
piece maketh four Foot.

Et sic de ceteris.

By

By this Table the length of
Field being generally the bread
of an Acre is set forth.

As for Example, The Field
6 Po. long, How much in bread
of that Field maketh an Acre
Look for 60 in the first Column
that Leaf, and against it to y
right Hand, I find 2 Po. 11 F
for the breadth of an Acre in t
Field.

Et sic de ceteris.

Ten Acres of 21 Fo. Po. mak
16 Acres, 26 Po. $\frac{2}{3}$ of a Po. of
Stat. Acre.

Ten Acres of 18 Fo. Po. mak
13 Acres, $\frac{1}{3}$ of a Po. 12 Po. $\frac{1}{3}$
a Po. is near the Square of an
of Land precisely. *Quia.*

*Singula cum valeant sunt ma
simul.*

Board

BOard, Wainscot, or Glass,
may be measured by the
ensuing Table, and by the Leaf
of 144 which is not in the Book
Printed : As suppose a Pane of
Glass to be nine Inches broad,
look the Table in the second
Leaf following for 9, and to
your right Hand in that Line
you shall find 16, so much of
that Pane of Glass maketh a
Foot.

Buying and Selling by the Hundred weight, are aptly done by the Table ensuing as a Farthing, a Pound, is Shillings 4 Pence the Hundred 2 Pound 6 Shillings 8 Pence the Tun.

So likewise three Pence Pound, is 28 Shillings the Hundred, and 28 pound the Tun. And so the Table sheweth from a Farthing to a Penny, Shilling and Pound.

THE

THE MONIES

Of $\left\{ \begin{array}{l} \text{Spain.} \\ \text{Portugal.} \\ \text{France.} \end{array} \right.$

With their Contents and Values
according to the Monies of
England.

I. of SPAIN.

A Ducat contains 11 Rials of
Plate, being worth 5 s. 6 d.

A Rial contains 34 Mervedies,
being worth 6 d.

E A Mervede is less than a Far-
thing.

So 34 Mervedies make a Rial,
11 Rials, or 374 Mervedies make
a Ducat.

A

A single Pistolet of Gold, contains 11 Rials and 3 Quartels, or 12 400 Mervedies, being worth 5 s. 10 d. 2 q.

2. of PORTUGAL.

A Ducat contains 10 Rials, or 400 Res, being worth 5 s.

A Rial contains 40 Res, being worth 6 d.

A Res is worth about half a q.

So 40 Res make a Rial, or 10 Rials, or 400 Res make a Ducat.

A Teston is 2 Rials and a half, being worth 15 d.

A Vinten is half a Rial, containing 20 Res, being worth 3 d.

The Miltes of Gold, containing 1000 Res, or 2 Ducats and a half is worth 12 s. 6 d.

3. of FRANCE.

The Escue, or French Crown, contains 3 Livres, or 60 Sous, being worth 6 s.

The Livre is 20 Sous, being worth 2 s.

The

The Sous contains 6 Liards, or
12 Deniers, being almost worth
s. 1 d. q. 5 are worth 6 d.

A Liard contains 2 Deniers.

The old Teston contains 14 Sous
and a half, being worth 1 s. 5 d. ob.

The New Teston contains 15
Sous, being worth 18 d.

Where note, that the *Flemish*
Crown is 2 Sous less than the *French*
Crown.

The KINTAL,
Or Hundred weight,

Of { *Portugal.*
Spain.
France.

1. of PORTUGAL.

THE Kintal of Pepper or
Ginger in *Lisbon*, called the
lesser Kintal, contains 112 l.

The Rove is the Quatern
weight, which contains 28 l. and
sometimes 2 or 3 l. more.

The

The Kintal of most sorts of all other Spices, contains 128 *l.* and is called the great Kintal.

The Rove, or Quartern thereof contains 32 *l.* it holds out about 14 or 16 *l.* more than our *English C.*

2. of SPAIN.

In most Parts the Kintal contains 100 *l.* of our *English* weight, but 102, so as our Hundred weight is 10 in the *C.* greater than theirs.

Except the Kintal of Iron in *Biskey*, which contains 150 *l.* and makes about 114 *l.* of our *English* weight.

3. of FRANCE.

In *Rockel* and *Bourdeaux*, and so in most Parts the Kintal contains 100 *l.* and holds out with our *English C.*

Saving that through falshood of the Weighers it falleth less in one Place than another.

The Measures of Cloth,

In $\left\{ \begin{array}{l} \text{Portugal.} \\ \text{Spain.} \\ \text{France.} \end{array} \right.$

In PORTUGAL.

THE Measure in *Lisbon* is the Covada, contains about three quarters of our *English* Yard: But Linen cloth is chiefly bought and sold by the Vare, which contains our *English* Yard, wanting a Nail.

In SPAIN.

The Measure is the Vare, containing as aforesaid.

In FRANCE.

The Measure is the Aulne, being almost a Yard longer than our *English* Ell.

The

The Measures of Corn and Salt,

In $\left\{ \begin{array}{l} \text{Portugal.} \\ \text{Spain.} \\ \text{France.} \end{array} \right.$

1 For Salt.

In P O R T U G A L.

THE Measure is called the Mui; and 60 Alquers make a Mui, and 2 Muys and 15 Alquers, or thereabouts, make a Tun of our Water-measure of *Bristol*.

In S P A I N.

The Measure is called the Kayis, containing 12 Hanicks, and 2 Kayis.

Three Hanicks, or thereabouts, make a Tun of Water-measure of *Bristol*.

In F R A N C E.

The Measure in *Roche!* is the Boiseau, whereof 24 make a Mui, 32 Muys make a Hundred, and 2 Muys

Muys make about a Tun and 5 Bushel of our *Bristol* measure ; the best Measure of all is the Oldron, which is 36 Muys to the Hundred, and every Hundred makes about 20 Tuns of our *Bristol* measure.

2. For Corn.

In P O R T U G A L.

The Measure of Corn in *Lisbon*, is the Alquer, whereof 3 make about a Bushel of our *Bristol* measure, which is 8 Gallons *Winchester*, and 5 Alquers or near thereabouts make a Hanic of *Spain* measure.

In S P A I N.

The Hanic contains about a Bushel and a half of our measure of *Bristol*.

In F R A N C E.

The measure of *Roche* and *Bordeaux* is the Boiseau, containing near about 3 Pecks of *Bristol* measure.

For the Use of this TABLE.

IF you would know how many Pole of 16 Foot $\frac{1}{2}$, 100 Pole of 25 Foot will make, look 100 Pole at Pole of 25 Foot, and directly against it finding 2500 Foot, look at Pole of 16 Foot $\frac{1}{2}$, where against 100 Pole you find 1650 Foot, against 50 Pole 825 Foot, against 1 Pole 16 Foot and $\frac{1}{2}$, all which added to make 2491 Foot $\frac{1}{2}$, which being deducted from 2500 Foot, resteth 8 Foot $\frac{1}{2}$: So I conclude, that 100 Pole of 25 Foot, will make 151 Pole 8 Foot and $\frac{1}{2}$ of 16 Foot $\frac{1}{2}$ Pole.

To reduce Poles into Acres: Suppose you find the Ground to contain 1680 Pole. Then look in the first Page of the Table for 1600 Poles, and right against it towards your left hand, you shall see 10 Acres, which is the Number desired.

A
TABLE

Declaring

The Present Worth of
Rents, Leases, or Annuities in
Possession or Reversion. Be-
ing accompted (as well for
the *Buyer* as for the *Seller*) af-
ter the Rate of 8 l. per Cent.

The Use whereof ensueth at
the end thereof.

40	11	2	3.	12. 160. 960.

The Use of the prece^dent T A B L E.

For a Lease in Possession.

IF you would know the Worth of a Lease for 10 Years, see the Number 10 in the first Column at your left Hand, under (Years) which signifieth Years, and directly against the same, you shall see 6.2.5.120.960, which declareth that a Lease Rent, or Annuity (being certain) is worth 6 Years Purchase, that is 6 times the Rent second, 5.120 and 960 part of Years Purchase: And so for any number of Years in possession.

For a Lease in Reversion.

TO know the present Worth of 21 Years in Reversion, after 10 in Possession, joyn both together and find what a Lease is worth for 31 Years, which being set down, subtract from it the worth of the 10 years in Possession, and the remain is the worth of the 21 Years in Reversion; if you cannot readily divide, you may by the Table next ensuing, which contains all the even parts of Pounds, Shillings and Pence, gather any parts of the Rent or Annuity desired.

Example.

The Rent for 10 Years being worth 6 Years Purchase, a second 6.120 and 960 part of a Year, to
H 5 reduce

reduce these parts into Sums, and those Sums into a Total, supposing the Rent is 20 Pound. First, 6 times 20 Pound, is 120 Pound, the second part of 20 Pound is 10 Pound, the fifth part of 20 Pound is 4 Pound; all these are easily reckoned, but for the 120 part of 20 Pound, find in the next Table ensuing, 120 which is on the head of the second Colume of the seventh Page, and under that Number against 20 Pound, you shall see 3 Shillings 4 Pence, which is the 120 part of 20 Pound.

Again, For the 960 part of 20 Pound, find in the same Table 960 which is on the head of the second Colume of the last Page, and under that Number against 20 Pound, you shall see 5 Pence, which is the 960 part of 20 Pound, and so of all others.

The

The Even Parts of Pounds, Shil- lings and Pence.

Whereby may be readily
found the 3. 4. 5. 6. 8. 10. 12.
15. 16. 20. 24. 30. 32. 40.
48. 60. 64. 80. 96. 120. 160.
192. 240. 320. 480. 960.
part of any Number of Pounds
Shillings and Pence.

The Use whereof ensueth at
the end thereof.

icardus

uffed is the true

Owner of this, Brooke, Aug. 23

This Brooke is previous in his sight

And in the same time takes delight

This is the quintessence of Art, & hee
Th. it omnes the same; doth know it
Good to be, for his vocation as speedy
remedy, so hee mistakes if any one
you see, for every Question here Re=
solved is if that the Printer do not
Figures misse
